

Tifleaf III

Tifleaf III is a compact 60 day maturity hybrid which produces 3-5 tons/acre. It's used for full or short season grazing or single cut forage. When grazing if it never heads out it regrows all summer long. Outstanding resistance to high humidity, disease prone, and/or sandy soil. Tifleaf III is all leaves with that high leaf mass assures a good protein and nutritional value. Sorghum sudangrass hybrids yield better and have more sugar. No Prussic Acid concerns when grazing.
